Celadon Blue
TM5 755

Antique Rose
TM5 756

Violet Mist
TM5 757

CHARACTERISTICS

True Matte 5 Glazes portray the color and durability you desire at mid-range. The colors present a soft, porcelain finish and can be used on a variety of clays, each providing distinctive, modern effects.

APPLICATION

Apply 2-3 flowing coats to stoneware or porcelain in the greenware or bisque stages.

FIRING

Fire to cone 5-6. Dry foot piece.

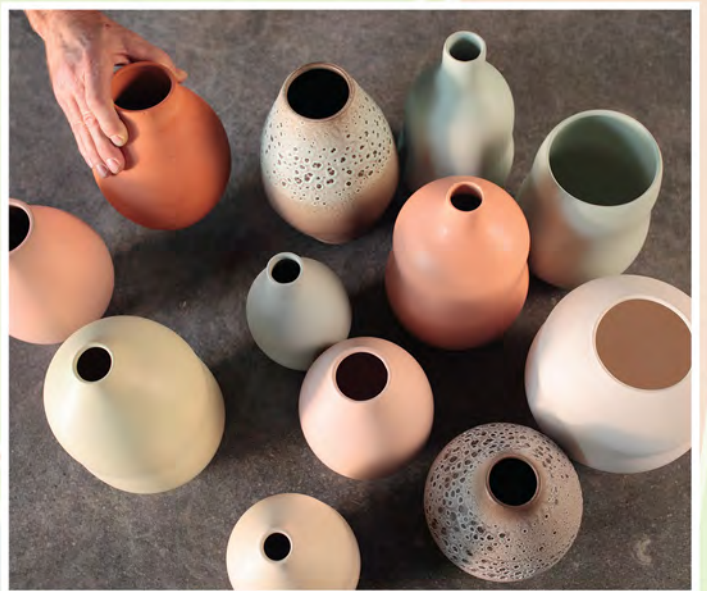

BRUSH AND PRODUCT CARE

Clean brushes with water. Wash rims of jars and the insides of the lids before reattaching.

CRATER EFFECTS

Use Cassius Basaltic clay to create a unique crater effect. See what the body does with full coverage application at the lip, mid application on the hips, and minimal application near the foot.

DIFFERENT CLAY EFFECTS

Depending on the type of clay used, True Matte 5 Glazes present distinct artistic finishes.

PORCELAIN 5 CLAY

Creates beautiful vibrant colors when full coverage is applied and fired to cone 5.

TERRA COTTA RED CLAY

Creates a smoked effect when glaze is applied to full coverage and fired to cone 5.

CASSIUS BASALTIC

Creates a crater effect when glaze is applied to full coverage and fired to cone 5.

CREATE UNIQUE EFFECTS BY LAYERING WITH OTHER GLAZES

Create a darker, glossy hue by applying Pure Brilliance® Clear Glaze over True Matte 5 Glazes. Pure Brilliance® Clear Glaze is formulated for cone 06 firing, but can withstand firing temperatures up to cone 6.*
